

Shipper Shield

CARRIER MONITORING PROGRAM

Are you at risk?

Selecting a carrier with an unacceptable safety rating can expose your organization to expensive legal actions.

Have your carriers' DOT safety ratings changed from 'Satisfactory' to 'Unsatisfactory'?

Do you know when your carriers' certificate of insurance expires?

Do you know if any of your carriers changed their MC# in the last five years and the related implications?

Do you know if your carrier has reduced its cargo coverage limit to a number below what you need to protect your goods?

Are you aware of the impact of CSA2010 on driver safety scores?

Are you aware if complaints have been filed against any of your carriers or brokers?

Shipper Shield addresses carrier selection that balances risk management with reason and current conditions in the marketplace.

Practice safe shipping.

Now more than ever, shippers must be diligent in their ongoing monitoring of carrier selection to ensure they are effectively managing risks.

Shipper Shield continually consolidates and reports on critical motor carrier details. This comprehensive program gives shippers the ability to substantiate and contract carriers with reasonable care and provides an audit trail to prove due diligence on the shipper's behalf.

Eliminate the hassle of visiting numerous sources for stats about your many carriers, and ease the concern that you may have overlooked critical information.

Protect your organization with *Shipper Shield*, the carrier monitoring program that watches the details so you don't have to. For a low monthly fee:

- Submit your current carriers for a report on their standings
- Monitor your carriers' SMS BASIC scores, authority, insurance and safety rating changes.
- Monitor an unlimited number of motor carriers and/or brokers
- Receive alerts that announce status changes that effect your carriers' qualification
- Alerts provide an audit trail validating that your organization has demonstrated due diligence
